

MOUNTAIN LIVING

KITCHENS TO LOVE

BOZEMAN, TELLURIDE, LAKE TAHOE...

TOP MOUNTAIN BUILDERS

A LOCAL GEM

For over 22 years **CATHERS HOME FURNITURE + INTERIOR DESIGN** has been providing personalized service, unique perspectives and beautiful designs to their clients in the Roaring Fork Valley.

Tell us about Caters' full-service approach to interior design.

Our philosophy is to immerse ourselves in a project as early in the design process as possible, because understanding our client's intentions and the architect's inspiration allows us to incorporate those ideas into every interior detail. We work closely with the owner throughout design and construction to help convey their ideas to the architect and contractors, and we continue that close relationship until the project is complete—right down to the selection of furnishings, fine art and accessories.

How do your clients benefit from working with a team that offers interior design services and a retail experience?

Combining an award-winning design team and 4,000-square-foot showroom allows our clients to interact with fabrics, furniture selections and home décor thus allowing us to fully understand their preferences. With the recent real estate boom, many of our clients have purchased a new home and need to have furnishings available immediately. New inventory arrives weekly—from rugs to light fixtures, bedroom sets to luxury sofas—allowing us to furnish and decorate certain aspects of a home within weeks.

What makes Cathers Home unique in the Roaring Fork Valley?

There is something special that comes with supporting your community, local businesses and working professionals. Since conception, Cathers' goal has been to provide personalized service and unique perspectives to our clients. At Cathers, we pride ourselves on building genuine relationships (unlike many large-scale chains) so we can create spaces specific to your lifestyle needs.
